To,

Google Play Support Team

Subject: - Appeal for Approval of 'My Booth Bareilly' App on Google Play Store.

Dear Google Play Store Team,

I am writing to appeal for the approval of the 'My Booth Bareilly' mobile application on the Google Play Store. We have recently encountered a rejection due to "app doesn't provide a clear source of government information or its description".

This mobile application is developed by M/S Navika Infotect, Bareilly on behalf of District Administration, Bareilly. Data are property of District Magistrate, Bareilly.

My Booth Bareilly is a crucial tool designed to increase percentage of voting during General LoK Sabha Elections 2024. It gives real time information about the number of voters in queue at any given time.

We understand Google's guidelines regarding the use of data and assure you this application adheres to all necessary privacy and security protocols. This application is designed with the utmost respect for user privacy, and we have implemented robust measures to ensure that location data is used responsibly and transparently.

Therefore, we kindly request a reconsideration of the rejection of My Booth Bareilly and Google to approve the app for publication on the Google Play Store. We are willing to provide any additional information or clarification required to facilitate the approval process. Thank you for your attention to this matter. We remain committed to upholding the high standards of user privacy and security while delivering essential services to our community.

Date:-03.04.2024
